EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Applicants Attorney (Wendi R. Schepler, Reg No. 43,091), on January 10, 2006, without traverse.
3. **The application has amended as follows: attach paper**

In the claims

43. (currently amended) A device comprising:

a first module configured to receive video images and to identify objects of interest in response to the video images;

a second module coupled to the first module and configured to classify a plurality of shape and posture categories based on a plurality of observed states of the objects of interest; and

a third module coupled to the second module, wherein the third module is configured to identify behaviors of the objects of interest using the plurality of shape and posture categories and standard object behaviors, and is further configured to analyze temporal ordering of behavior primitives using time-series analysis to identify a transition from a previous behavior primitive to a next behavior primitive.

51. (currently amended) A method of characterizing an activity comprising:

obtaining a stream of video image frames from a monitoring device;

identifying objects of interest from the stream of video image frames;

providing feature information of the objects of interest in response to the stream of video image frames;

classifying postures of the objects of interest in response to the feature information;

obtaining standard object behaviors from a storage memory device; and

characterizing behaviors of the objects of interest in response to a comparison between the postures of the objects of interest and the standard object behaviors, wherein the characterizing the behaviors of the objects of interest further includes analyzing temporal ordering of behavior primitives using time-series analysis to identify a transition from a previous behavior primitive to a next behavior primitive.

REASONS FOR ALLOWANCE

4. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/15/2005 has been entered.

5. The following is an examiner's statement of reasons for allowance.

Based on telephone interview and fax inquiry, filed 1/10/2006, see page 11 through page 20, of the remarks, with respect to claims 43-51 and 53-80 have been fully considered and are persuasive and upon further consideration the 103(a) art rejection of claims 43-51 and 53-80, has been withdrawn.

6. Claims 43-51 and 53-80 now renumbered as 1-37 is allowed.

Based on applicant's amendment, claim 43 representing claims 51,64 and 75, the closest prior art of record (Maki and Fowler) references do not disclose or suggest, among other things, "third module is configured using the plurality of shape and posture categories and standard object behaviors, and is further configured to analyze temporal ordering of behavior primitives using time-series analysis to identify a transition from a previous behavior primitive to a next behavior primitive.

These key features in combination with the other features of the claimed invention are neither taught nor suggested by (Maki and Fowler) prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
